

BIG TRENDS TO WATCH IN THE MARKET

Ryan Lundquist - Appraiser
www.SacramentoAppraisalBlog.com

Things to get out of this talk:

- 1) Understand more fully what the market is doing.
- 2) Pick up some ways to describe the market to clients.
- 3) Get some ideas for where to focus business in 2020.

REAL ESTATE

Confidence in housing weakens just as homes become more affordable

PUBLISHED MON, OCT 7 2019•10:30 AM EDT | UPDATED MON, OCT 7 2019•4:54 PM EDT

SHARE

KEY POINTS

- Consumer sentiment on housing fell in September from its August high, according to a monthly survey from Fannie Mae.
- While more respondents think now is both a good time to buy and sell a home, there was a much larger drop in the share of those who said they were not concerned about losing their jobs.
- It was the second straight month that the component of the survey fell.

Is The Sacramento Real Estate Bubble Ready To Burst?

By Rachel Wulff July 29, 2019 at 11:26 pm Filed Under: Real Estate, Sacramento Housing

SACRAMENTO (CBS13) – For the first time in 14 years, Sacramento home prices are nearing where they were prior to the market crash in the mid-2000s, which has some worried it could happen again.

Experts say the numbers are the same but tell a different story.

California's housing market probably will slow in 2020, Realtors say

Median home price probably will rise only 2.5% to \$607,900

September 26, 2019 By Kathleen Howley

Share On [Twitter](#) [Facebook](#) [Email](#) [LinkedIn](#)

Economic uncertainty and high prices are muting the housing market in the nation's most populous state, according to the **California Association of Realtors**.

The median home price in California likely will increase by 2.5% to \$607,900 in 2020, slowing from a projected 4.1% annual gain in 2019, CAR said in a forecast Thursday. Sales of existing single-family homes probably will gain 0.8% in 2020 to reach 393,500, following a 3.1% drop this year from 2018's level, the group said.

Low mortgage rates are making it easier for buyers to afford homes, but that's being offset by the Trump administration's trade wars that have increased the chances of an economic contraction, said Jared Martin, president of CAR.

"Buyers have more purchasing power than in years past, but they may be reluctant to get off the sidelines because of economic and market uncertainties," Martin said. "Additionally, an affordability crunch will cut into

STRANGER TRENDS

Ways I'm describing the market:

- It feels a bit normal right now
- Competitive if priced right
- Modest price growth
- Slumping volume
- There's an element of uncertainty

There's been a disconnect between buyers & sellers

The market used to be going 80mph...

Two Truths:

- 1) Price momentum is slowing
- 2) SLOW is not a dirty word in real estate

SacramentoAppraisalBlog.com (C) 2019

The temptation is to explain away anything negative

Realtors' ads tout bargains - National campaign urges buyers to act now before the housing downturn reverses and prices rise.

November 3, 2006 Sacramento Bee, The (CA)

Author: Jim WassermanBee Staff Writer | Page: D1 | Section: BUSINESS

640 Words

Aiming to move thousands of would-be homebuyers off the fence, the National Association of Realtors is launching a major advertising campaign today suggesting, "It's a great time to buy or sell a home."

Full-page ads appearing in today's Wall Street Journal and USA Today and four more newspapers on Sunday cite low interest rates, a large inventory of for-sale houses and a positive economic outlook among reasons buyers should "act now before the market changes."

SacramentoAppraisalBlog.com (C) 2019

Many try to find a way to explain away the slowness

“The market is slower because of the rain.”

“The market is slow because of all the smoke from the Camp Fire.”

“Sales are down because of Bay Area buyers.”

“We’ve had less new construction which makes it slower...”

SacramentoAppraisalBlog.com (C) 2019

**“How do I convince someone
the market is okay?”**

Will prices tank during a recession?

“Recession”

**Does
Not
Equal**

**“Housing
Crisis”**

Home prices have **appreciated**
during **3 of the last 5** recessions!

Home Price Change
During the Last 5 Recessions

Deep Recession Thoughts

- Not all recessions are created equal.
- The severity of a recession matters.
- Prices don't always decline during a recession.
- Prices can decline **after** a recession.

Dotted line at 3.57% average for week of October 10, 2019

Source: Leonard Kiefer @lenkieferr (Twitter)
SacramentoAppraisalBlog.com (C) 2019

Rate Takeaways:

- Low rates have helped propel the market up for 7 years
- Low rates changed the feel of the market this year
- The immediate future of the market is likely to be heavily influenced by the direction of rates
- Rates don't historically drive the market, but right now the market is hyper-sensitive to rate changes
- Low rates create less incentive to sell.
- Lowering rates further feels like a temporary solution

Ryan Lundquist - Real Estate Appraiser I hear you. I think lots of people are thinking the same way. I would just recommend looking at your goals, the current cost of housing, and then weigh your decisions. And of course realize that very few people are able to successfully time a market in...

Deep Bubble Thoughts

- Prices are similar, but dynamics are different
- There is no formula that says we'll pop at a certain price
- Some buyers are hesitant about buying today
- Most people buy based on lifestyle & affordability
- Some sellers are hoping to time the market perfectly
- The previous “bubble” is not a template for every market correction in the future
- “Which house do you want to ride down the market in?”
(Mike Gobbi)

Closing thoughts to focus business in 2020

- 1) Be fluent in trends so you can spot what is normal vs what is not.
- 2) Be careful about regurgitating sensational headlines that might not apply in our market.
- 3) Don't be afraid to call the market soft or slower if it is. You earn credibility for doing that.
- 4) Realize the market is always either good or bad for some regardless of what prices are doing.
- 5) Be well prepared for "bubble" conversations.
- 6) Don't overprice your listings. Buyers are really sensitive to overpricing.
- 7) Crush it to find deals because you're competing with Zillow now.
- 8) Become well-informed about how 1031 exchanges work.
- 9) Watch for some investors wanting to sell in light of rent control.
- 10) Watch Prop 13 reform closely and opportunities from that.
- 11) Increase your valuation skills. How would you value in a downward price cycle?
- 12) Study migration patterns so you can help owners wanting to move out of the market.
- 13) Find sellers who have incentive to move right now.
- 14) Find buyers who are moving because of their lifestyle and ability to afford.
- 15) Keep an eye on the Bay Area market and be ready for some inbound growth.
- 16) Diversify where the iBuyer models are not going.
- 17) Be aware of consumer behavior if we head toward a recession (tighten finances / smaller homes)
- 18) Be in tune with rent control laws so you can avoid mistakes.
- 19) Don't keep doing the same thing because it won't work in every market.
